

ABSTRACT

5 A printhead assembly is provided comprising at least one printhead module comprising at least two
printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the
surface of print media, a support member for supporting and carrying the printing fluid for the at least two
10 printhead integrated circuits, and an electrical connector for connecting electrical signals to the at least two
printhead integrated circuits, drive electronics incorporating at least one controller which is connected to at
least one of the at least two printhead integrated circuits via the electrical connector for controlling the printing
operation of at least one of the at least two printhead integrated circuits, and a casing in which the at least one
15 printhead module and the drive electronics are removably mounted.
